***Status of Claims***

1. Claims 1-4, 6-9, 11-14, 16-19, 21-24, and 26-28 have been examined.

***Response to Amendments/Arguments***

2. Applicant has amended the claims to recite content represented as at least one music program “that is subdivided into parts *selected from the group consisting of* music parts and phrases” (emphasis added). Therefore, in order for the prior art to read on Applicant’s claimed system all that is required is that the prior art teach content that is subdivided into music parts or phrases. Ginter et al. teach downstream content distribution (figures 79-83) wherein a downstream content creator can modify received content by adding her/his own content to the received content (e.g. content is expressed in one form, converted to another form of use different than the original where use is based on restriction information) (column/line 285/65-287/45) and each creator establishes use ranges that governs the use of what he/she has created (column 137, lines 50-64; column 155, lines 38-51; column 157, lines 1-13; column 166, lines 25-32; column 294, lines 17-51). According to Ginter et al. sheet music is content (column 141, lines 5-14) therefore, the prior art renders obvious a musical

composition where use of the composition is determined by the creator(s) of its various parts.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4, 6-9, 11-14, 16-19, 21-24, and 26-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ginter et al., U.S. Patent No. 5,892,900 in view of Erickson, U.S. Patent No. 5,765,152.

As per claims 1-4, 6-9, 11-14, 16-19, 21-24, and 26-28, Ginter et al. teach a contents providing service system comprising:

- contents file that includes encrypted (partial) content (e.g. music) and use restriction information (figure 19; column 135, lines 20-34; column 141, lines 5-25), use allow range and use prohibit range (column 137, lines 50-64; column 155, lines 38-51; column 157, lines 1-13; column 166, lines 25-32; column 294, lines 17-51) and

provisional use prohibit range that provides for conditional use of content after fee payment (figure 72D; column 36, lines 22-38; column 140, lines 25-38; column 160, lines 15-35)

- server supply unit for supplying content to client (column 18, lines 55-63; column 134, lines 39-58; column 315, lines 25-42)
- client apparatus comprising decoding unit and a restricting unit for (figure 7; column 60, lines 7-44; column 62, lines 32-50)
- client apparatus for transmitting to the server apparatus for requesting use of content (figure 72D) and for implementing user restriction (figure 7; column 60, lines 7-44; column 62, lines 32-50)
- server apparatus includes a user approve unit for transmitting a user approval to the client apparatus in response to fee paid and allows client to use content based on restriction information (figure 72D)

Ginter et al. teach content distribution system where content usage is determined by rights or restriction (column 9, lines 20-24). However, Ginter et al. do not specifically recite "representation modes". Erickson teaches a content distribution system that allows users to obtain additional rights that allow users to process content using varying representation modes (figures 1, 5A-B, and 7A-D).

Therefore, it would have been obvious to one of ordinary skill to combine the

teachings of Ginter et al. and Erickson in order to allow content providers to receive additional revenues for use, such as modification, of their content.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
